## Abusing zephyr and meta-zephyr

*Wednesday, 14 September 2022 10:55 (25 minutes)*

This talk will talk about the work done to switch from cmake to west in meta-zephyr and how I leveraged this work to do bad things with zephyr and meta-zephyr to generate Yocto Project machine definitions for meta-zephyr. We'll discuss why these patches are not zephyr upstreamable and why autogenerated machine definitions are not included in meta-zephyr.
