Binutils BoF

A chance for Binutils users and developers to discuss the future directions of the project
The Future of GOLD?

- No longer being developed by Google
- Not many maintainers
  + Still popular
Autogenerate Changelogs

+ Already done by GCC
  - Not done by GDB
+ Helpful for beginners?
  - Not flexible enough?
Closer Ties with LLD?

Ability to run each other’s testsuite?
Feature compatibility?
Command line compatibility?
Anything Else?

Your chance to voice your concerns
