How do we kick our RT habit?

Prakash Sangappa, Dhaval Giani
Oracle
Tests – Compare RT vs -ve Nice

- 68 Thread VM
- Cluster DB setup with 4 critical process per node.
- Runs with 64 and 256 client connections (running locally)
- Spawn a server process per client connection
- Run critical processes at RT vs CFS -20
- Taskset to isolate critical processes to CPU 0-3
Throughput

[Bar chart showing throughput results for 64 and 256 Client scenarios with three categories: Realtime, Nice 0, and Nice -20]
256 Clients

Throughput

- Realtime
- Nice 0
- Nice -20
- Nice -20 taskset
