Print-Scan-Fax in Linux

- **Driverless Print**

There has been a lot which has been achieved in this space yet there is a long way to go...

- **Driverless Scan:**

Things have been conceptualised. Driverless scan is going to be the new reality in coming days.

- **Driverless Fax:**

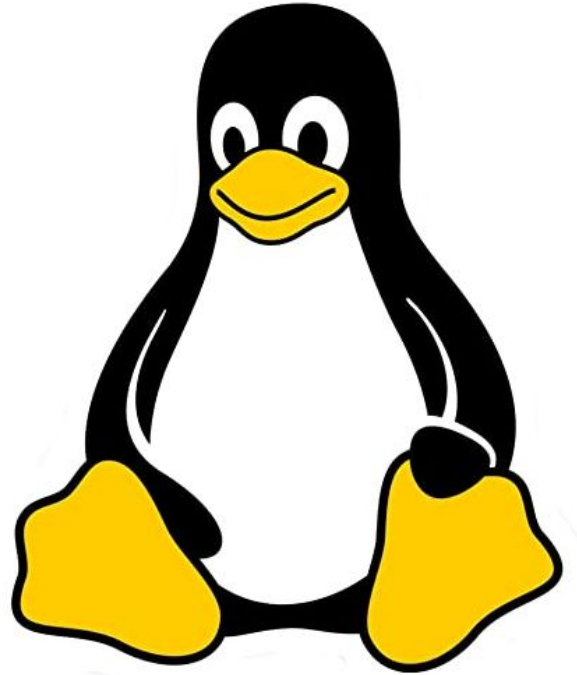

FAX to soon follow the roadmap of print and scan.

- **Future of Printing:**

Print Application to replace the traditional way of printing.

- **3D Printing:**

Can 3D printing be as as easy as conventional 2D printing?
